Redwood

Redwood, often referred to as “Red”, is an energetic teenager whose brawns often precedes him. Coming from a family of massive beings, it comes to no surprise why he was so big and strong. However, his stature does not compare to his brothers who often ridicule him for being the “runt”. Although it bothers him, he rarely lets it interfere with his social life with others. Because of his popularity and success as an athlete in school, the harassment by his brothers is suppressed.

Dr. Robtnik

Dr. Robotnik, simply referred to as “The Scientist” because it is easier to pronounce, is a mysterious human who appears in the city. Unbeknown to anyone else, the Scientist is the sole reason why the world is the way it is now. During his early experimentations, he aimed to restructure the Earth in a way that involved synthetic creatures overseeing operations. When things took a turn for the worst, he froze himself in an ice cap for centuries to protect against the very dangers he constructed, the synths. Upon his revival, he still looks to execute his plans, but he must be careful so as not to be exposed for his nefarious ways.
